

aLuminate™

Light Shelves by TUBELITE®

More Natural Daylight
Less Artificial Lighting Needs

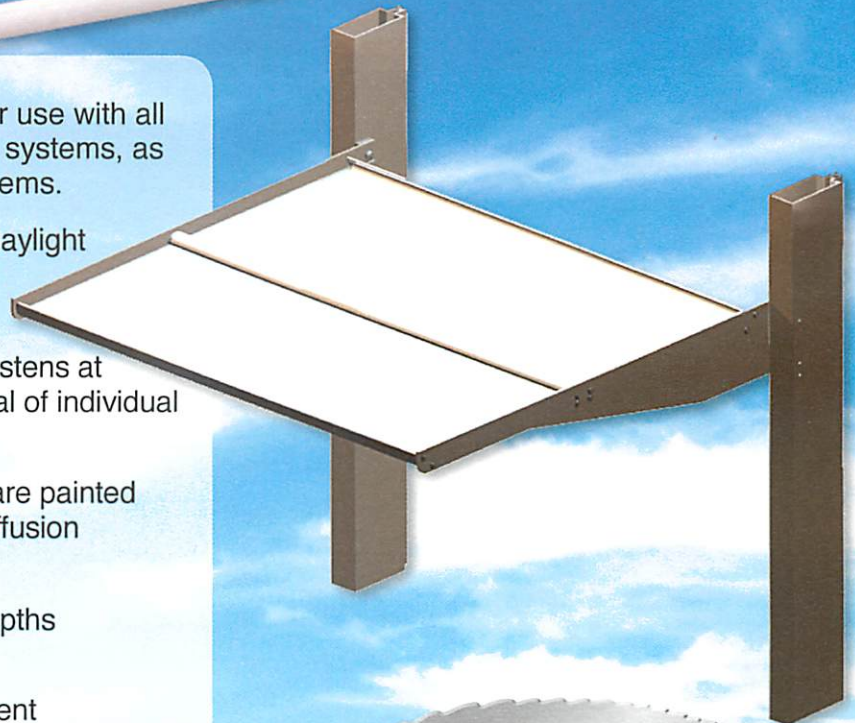

aLuminate™ light shelves are designed for use with all Tubelite storefront and curtainwall framing systems, as well as many other aluminum framing systems.

Effectively increase the amount of natural daylight reaching deeper into occupied areas which reduces the need for artificial light.

A unique, easy to install in-rigger bracket fastens at the interior vertical, and allows easy removal of individual sections for glass cleaning.

Horizontal stretchers and aluminum sheet are painted bright white for maximum reflectivity and diffusion of sunlight.

- Overall 24" and 36" in-rigger projection depths
- Horizontal spans of up to 60"
- In-riggers can be finished to match or accent adjacent framing
- Stretcher bars and In-riggers are made from Tubelite Ecoluminum™
- Fastens directly to Tubelite Storefront or Curtainwall vertical members
- Lightweight for quick and easy removal and cleaning
- Minimal number of parts and simple design allows easy installation

More recycled content, eco-efficient finishes

GET THE POINT!

aLuminate can help with the following LEED points:

- EA 1 - Optimize Energy Performance
- MR 4.1 & 4.2 Recycled Content
- IEQ 8.1 & 8.2 Daylight & Views
