

Syracuse Glass Becomes a Member of the *Vitro Certified*[™] Fabricator Network

March 2022 – Launched in 2001 by Vitro Architectural Glass (formerly PPG Glass), the *Vitro Certified*[™] Network was created to provide high-performance coated glass through regional fabricators and glass manufacturers dedicated to delivery of quality fabricated glass with short lead times.

“We have long valued the partnership that we have had with Vitro and appreciate the thorough and comprehensive audit and qualification process that we completed to be added to this program. This certification allows us to bring the full line of Vitro products to our clients and comes at an appropriate time as we not only grow our presence in our core market, but also continue to expand throughout New England,” said Syracuse Glass Company Chief Executive Officer Joe Gudenburr.

The TEAM at Syracuse Glass Company (SGC) has long been a supplier of fabricated glass products supplied by Vitro, and as a newly *Vitro Certified*[™] Network Partner, SGC can provide the full line of Vitro glass and technical solutions.

“Vitro is pleased to add Syracuse Glass to our *Vitro Certified*[™] Network of fabricators. All *Vitro Certified*[™] Network members are carefully vetted and audited to deliver the utmost quality and service to glaziers across the country and around the globe. We are proud of our partnership with our customers, like Syracuse Glass, and are excited about their future success,” noted Joanne Funyak, director of the *Vitro Certified*[™] Network and Customer Service.

Members of the *Vitro Certified*[™] Network have access to some of the industry’s most advanced training and education on glass handling and fabrication to maintain consistency in both color and quality, as well as reliability of product performance.

Vitro Certified[™] Fabricators are the exclusive source of Vitro Architectural Glass high-performance *Solarban*[®] solar control low-e glass products and can accommodate special shape and configuration requests. Count on them to deliver quality fabricated glass with outstanding service and quick turnaround times, critical when lead times are tight. With locations throughout the United States and Canada, a *Vitro Certified*[™] Fabricator is available to provide Vitro glass products wherever they’re needed.
