High Performance Coatings

PPG ICD Partnership

Welcome to ICD High Performance Coatings, the World Leader in color spandrel coatings for glass. The combination of PPG *Starphire*® Ultra-Clear Glass and OPACI-COAT-300® Silicone Spandrel will give your project perfect color with the environmental value you desire.

Our palette of colors is unending, whatever you envision we can create. With ICD and PPG you will be assured of the highest quality.

Words that describe the results of this combination are Vivid and Pure. Colors are just simply pure and vivid allowing you to worry about nothing in regards to performance and color.

To learn more follow these links:

- What are *OPACI-COAT-300*® and Silicone Spandrel?
- Need specifications on the *OPACI-COAT-300*®?
- See some Interior and Exterior projects to inspire you.
- Why use Silicone over Ceramic Enamel?
- We are proud to be a part of the US Green Building Council, would you like LEED and Green Product Information?
